Available on loan from CIA library is a
The enclosed sample was part of a swatch of materials woven by a French textile manufacturer from French produced nylon which is now being marketed in France.

25X1X6 [REDACTED] states unequivocally that this textile represents the greatest improvement in nylon textile since the invention of nylon; that it has none of the disadvantages so far encountered in nylon textile manufacture in the US. [REDACTED] states that this type of nylon textile has been subjected to extensive tests by various agencies in France and found particularly suitable for use in the tropics in articles of clothing for Army and Navy personnel, particularly shirts and shorts for officers' wear. 25X1X

25X1X6 [REDACTED] has submitted this purely as a matter of interest, since neither he nor his company have any commercial interest in the fabric.
